web development project achieved

👤 PROFILE

With 7 year of experience in machining industry as quality technician, 3 year of experience in the private security sector as security agent and 6 year of experience in entrepreneurial projects in France and Central African Republic, I go on developing my skills in software and web development fields. During all this various professional experiences, I learn a lot on how to lead a project (PDCA), how to manage a production process with quality insurance, how to build an effective security system and so on. Now, I am skilled to build website, web application. I am always up to take a new challenge and give the best of me, especially in a situation where i can optimize my bi-cultural background.

📁 EMPLOYMENT HISTORY

Product quality technician at Ensinger, Beynost, France

March 2020 — January 2021
